

Series 600

Coatings made in Germany - since 1960

WEAR-PROTECTIVE ELASTOMERS CASTABLE / TROWELABLE

MetaLine® Series 600 - brush-, trowel- or castable elastomers for highly elastic linings & rubber repair work

- in a variety of hardnesses (65/85/95 Shore A)
- in any thickness
- self colorable in many tints
- adheres to almost any substrate

- Permanently elastic
- Wear resistant
- Self-processable
- Seamless applicable
- Shock absorbing
- Repairable
- Corrosion resistant
- Electrically insulating
- Tinting as per choice
- Chemically resistant
- Solvent-free
- Variable thicknesses
- Slide enhancing
- Noise reducing
- Non-stick properties

Rubber Coatings

Resurface partial damage without vulcanisation and achieve an increased wear-resistance. Hardness and static friction (stiction) can be adapted to the original part. Resists dynamic impact, puncture & pressure.

Repairs

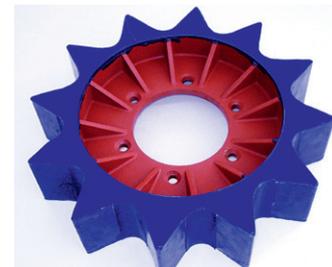

Cracks, cuts or other defects can often be repaired in situ - without disassembly. Machinable to high precision standards. Adheres to almost all types of natural rubber, polyurethane, metals and polar plastics.

Individual Part Production

Prototypes or small series can be cost-effectively casted or machined with permanently elastic surface properties. Protects sensitive surfaces from scratches, marks, dents or discoloration.

Casting work

Suitable for die-casting or the production of elastomeric molds. Resistant against aggressive mechanical attack and basic chemical exposure. Non-stick properties can be implemented to prevent "caking".

MetaLine® Series 600

state of the art coating solutions from professionals for professionals - made in Germany!
